Professional Profile

Over a decade of energy-sector experience, with expertise in organizing goods and services tenders, technical and commercial bid evaluation, negotiation and contract administration. Experienced across RFI, RFQ and RFP processes, supplier selection and contract execution, with additional expertise in strategic sourcing, supply chain management and international logistics. Uses business intelligence and data analysis to support cost control, supplier performance and business decisions.

Core Skills

Supply chain	Procurement · International logistics · Contracts	Operations	Negotiation · Supplier performance · Cost analysis
Data tools	Power BI · DAX · Python · SQL	Languages	Mandarin · English · French

Experience

Gabo Group · Canada
Nov 2025 – Present

Business Analyst | Toronto, Canada

- Sales & inventory analysis: Use actual SKU sales, stock levels and sales trends to recommend replenishment, maintaining suitable inventory while balancing stockout and excess-stock risks.
- Store fixture monitoring: Monitor fixture changes across more than 3,000 stores in Canada and maintain store configuration data to support product allocation, inventory placement and replenishment.
- Reporting & performance monitoring: Consolidate and validate sales, inventory and operating data; prepare reports and identify exceptions and trends to support business decisions.
- Requirements & process improvement: Gather and communicate business requirements, work with procurement and operations on process improvements, and track implementation.

MES Inc. · United States
2023.01 - 2025.03

Supply Chain Operations & IT Analyst 2024.04 - 2025.03 | Supply Chain & Financial Analyst 2023.01 - 2024.04 | Columbus, Ohio, USA

- Supply chain & financial analysis: Integrate purchasing, transport and warehouse data; analyze on-time delivery, quality, margins and break-even performance to support supplier selection and tenders.
- Logistics dashboards & cost forecasting: Develop Power BI dashboards to track logistics provider performance, contract execution and international freight movements, supporting cost forecasts against contract terms.
- Supplier performance management: Segment and assess suppliers against key performance indicators, support quarterly reviews, and replace underperforming logistics providers with qualified partners.
- Logistics planning & improvement: Support international logistics and inventory allocation; improve customs services, packaging, routes and warehouse processes, tracking financial impact.
- Demand forecasting & budgeting: Coordinate annual and semiannual demand forecasts and budgets across sales, finance and planning, aligning business goals with logistics execution.

Poly-GCL Petroleum · Ethiopia Branch
2014.03 - 2021.04

Senior Logistics Manager / Procurement Director | Addis Ababa, Ethiopia / Djibouti

- Goods & services tendering: Coordinate tenders for equipment, materials and services, including requirements, tender documents, evaluation criteria, invitations and bid administration.
- Bid evaluation & negotiation: Define evaluation criteria, coordinate technical and commercial reviews, assess pricing and supplier capability, and negotiate price, payment and service terms.
- Contract administration & delivery: Track contract execution, delivery and service quality; coordinate amendments, performance issues and supplier communication, maintaining contract records.
- Provider qualification & performance: Assess logistics provider qualifications, compliance and safety; lead strategic partner performance reviews and address transport and contractual risks.
- International EPC logistics: Plan international EPC transport and control total cost of ownership; reduce disruption risks and support digital logistics and tendering platforms.

Sinopec Oilfield Service · Algeria Branch
2006.12 - 2014.03

French Translator / Procurement & Logistics Engineer | Algiers, Algeria

- International transport coordination: Coordinate third-party logistics for consolidation, expediting and sea, air and road transport; follow deliveries and handle transport insurance and claims.
- Project tendering & inventory optimization: Prepare tender documents and evaluation criteria, participate in bid reviews and negotiations, and optimize warehouse movements and stock levels against downtime risks.
